PRODUCT DESCRIPTION

This 4" stainless steel surface mounted bollard offers solid protection with a sleek, professional appearance. Standing 36" tall, it is constructed from schedule 40 steel and finished in durable #304 stainless steel for corrosion resistance and long-lasting performance.

The one-piece design includes a welded-on cap for added strength and visual appeal. The 8" diameter base plate is 0.55" thick and features four 0.75" holes for secure surface mounting. No core drilling or excavation is required, saving time and labor.

Ideal bollard solution for protecting meters, circuit boxes, dock doors, and other key facility points. The updated design includes new optional base covers that conceal bolts and enhance the overall look.
