PRODUCT DESCRIPTION

4" x 42" Bolt Down Bollard

This 4" diameter surface mounted bollard stands 42" tall and features a durable one-piece steel design with a welded-on cap. It provides effective protection and visual deterrence for a variety of applications, including dock doors, circuit boxes, and other facility access points.

The 8" x 8" base plate is 0.55" thick and includes four 0.75" holes for easy and secure mounting. No core drilling or excavation is required, making installation fast and efficient. Optional base covers are available to conceal anchor bolts and improve the finished look.

Two wall thickness options are available to meet your specific needs. Choose schedule 10 steel at 25 pounds for lighter installations or schedule 40 steel at 45 pounds for enhanced strength. The new lightweight wall option offers the same visual deterrence with reduced weight.
