PRODUCT DESCRIPTION

4" x 48" Bolt Down Bollard

This 4" x 48" bolt down bollard delivers dependable protection in high-traffic areas. Constructed from durable schedule 40 steel, it stands 48" tall with a 4" outer diameter. The bollard features a bright powder coated yellow finish that enhances visibility and resists wear over time.

Designed for fast and easy installation, the bollard includes an 8" x 8" base plate that is 0.55" thick and pre-drilled with four 0.75" holes. No core drilling or excavation is required, making it ideal for retrofit or surface-mounted applications.

The one-piece welded construction includes a rounded cap for a clean appearance and added strength. Perfect for protecting meters, circuit boxes, dock doors, and building corners. Optional base covers are available to conceal anchor bolts and improve the finished look.
