1/2" x 4" Concrete Anchor Bolts (Set of 4) [SKU: CABT]
Include Shackle Lock

PRODUCT DESCRIPTION

Collapsible Bollard

This collapsible bollard offers fast, flexible access control in high-traffic or restricted areas. Built from solid schedule 40 steel with a durable yellow powder-coated finish, it provides strong visual and physical deterrence while easily folding down when access is needed.

The hinged design folds in either direction at a 90-degree angle and secures in the upright position using an external padlock (sold separately). With a collapsed height of just 4.1", most vehicles with standard ride height can safely pass over the bollard when it is lowered. Drivers of low-clearance vehicles such as sports cars should confirm ground clearance before crossing.

Installation is quick and efficient with no need for core drilling or excavation. Simply surface mount the unit using appropriate fasteners (not included). Ideal for controlling access to parking lots, loading areas, private roads, or gated facilities.
