Installation Type	Surface Mount
Outer Diameter	2-3/8" pipe
Material	Steel Pipe / HDPE Plastic
Base Size	8" x 8"

AVAILABLE ADD-ONS

Add-On
Detent Bracket Kit

PRODUCT DESCRIPTION

The FlexBollard-XL with Signpost is a rugged, high-performance solution for mounting signs in demanding environments. This system combines the proven durability of a Post Guard bollard cover with a hidden high-strength spring base and integrated signpost, offering unmatched resilience and visibility in one easy-to-install package.

Built to take a hit, the internal spring flexes in all directions to absorb high-speed impacts. At 5/16 inch thick, the steel spring is concealed within a galvanized base, allowing the bollard to rebound after impact and minimize costly damage to vehicles or property.

This all-in-one sign solution supports large or multiple regulatory signs with a design that resists high winds and harsh weather. An optional detent bracket kit keeps the post rigid until struck, offering additional stability in sensitive locations.

Commonly used in restaurants, car washes, parking areas, retail stores, gas stations, stadiums, convention centers, hotels, and hospitals, this flexible bollard with signpost provides both protection and clear messaging in any setting. Mounting hardware is included for concrete, asphalt, or adhesive installation.
