| Outer Diameter      | 1-5/8"         |
| Base Size           | 9" x 9" x 1/8" |

## PRODUCT DESCRIPTION

FlexPost Rigid is a versatile, semi-flexible signpost system designed for situations where a rigid appearance is needed without sacrificing impact recovery. Instead of a spring, it uses a precision-engineered adapter sleeve with diagonal cuts that allow the post to bend at a controlled pivot point. This unique design lets the post absorb light impact and be manually returned to its upright position: no tools, no replacements, no hassle.

The adapter can be factory-cut for firmer or more forgiving movement, offering customizable performance based on your site's needs. And when future flexibility is desired, FlexPost Rigid easily converts to a full FlexPost or FlexBollard™ system, just swap the adapter for the original spring, and you're ready to go.

Ideal for high-traffic and high-visibility areas, FlexPost Rigid is used in restaurants, car washes, parking lots, retail centers, gas stations, stadiums, convention and banquet centers, hotels, and hospitals—delivering a clean, professional look with practical impact resistance.
