Highlighted Features

- 48" tall flexible bollard with reflective stripes for high visibility
- Folds 360 degrees on impact and withstands up to 15 MPH vehicle strikes
- 380 PSI magnetic connection allows fast removal with optional puller tool
- Soft rubber base and ADA-compliant zinc plate stay flush to the ground
- Simple surface mounting—no core drilling or heavy equipment needed

SELECTABLE PRODUCT OPTIONS

Cover Color	Yellow / Red / Blue / Grey / Black / White / Beige / Brown / Green / Orange
Tape Color	No Tape / Red / White
Mounting Plates	Asphalt Mounting Plate / Concrete Mounting Plate / No Mounting Hardware

SPECIFICATIONS

Base Size	6" Round
Outer Diameter	7"
Height	48"
Installation Type	Surface Mount

PRODUCT DESCRIPTION

The 7" x 48" Gorilla Post™ Bollard with Reflective Stripes is designed for high-visibility, temporary pedestrian and traffic control. Ideal for creating clearly defined walkways where vehicles and pedestrians intersect, or for managing flexible traffic patterns, this 7" diameter bollard delivers reliable performance in high-traffic environments. The post is engineered to flex 360 degrees upon impact, returning upright to maintain clear delineation, and can withstand a direct hit at speeds up to 15 MPH.

Each Gorilla Post Bollard locks securely to an epoxied steel base plate using a powerful 380 PSI neodymium magnetic system. The post can be detached in seconds using a dedicated removal tool, leaving only a low-profile, ADA-compliant zinc plate behind—perfect for sites requiring clean surfaces such as post-tensioned concrete. Designed for quick setup, easy maintenance, and maximum durability, this system offers a dependable solution for both indoor and outdoor traffic safety.

Applications include sidewalks, parking lots, garages, ramps, factory floors, loading docks, concourses, pedestrian queues and pathways, as well as drive-through lanes. The included 6" soft rubber base and 7" diameter Post Guard Bollard Cover ensure durability, visibility, and safety in all conditions.

Removal is made simple with either the Post Puller or Post Puller Jr., depending on your preference. Gorilla Post combines ease of use with unmatched holding power to meet the needs of dynamic traffic control environments.
