|---|---|
| **Color** | White / Yellow with White Reflective Tape |
| **Mounting Plates** | Asphalt Mounting Plate / Concrete Mounting Plate / No Mounting Hardware |

## SPECIFICATIONS

| | |
|---|---|
| **Base Size** | 6" Round |
| **Outer Diameter** | 4" |
| **Height** | 48" |
| **Installation Method** | Surface Mount |

## PRODUCT DESCRIPTION

The Gorilla Post 4" x 48" is the ideal solution for temporary signage and traffic control where flexibility, visibility, and durability are critical. This high-performance bollard is specifically designed for areas where pedestrian walkways intersect with vehicular roadways, emergency access zones, and campus or venue control points.

Its 4" wide diameter provides superior visibility over standard delineators, enhancing driver awareness. The unit is engineered with a patented reactive spring system that allows it to flex upon impact and return to its original upright position, reducing the need for frequent replacements. A strong set of magnets provides 380 PSI of vertical lift force, keeping the bollard securely attached to its metal base—yet it can be removed quickly with the exclusive Post Puller tool.

This lightweight bollard is easy to deploy and reposition. The compact ADA-compliant mounting plate ensures minimal trip hazard, and the soft rubber base makes it ideal for areas where snow removal or thorough cleaning is necessary.

Available in Yellow or White with optional reflective stripes, the Gorilla Post delivers lasting performance in any weather or environment.
