- ✓ Lightweight and easy to install on asphalt for temporary or permanent protection

SELECTABLE PRODUCT OPTIONS

Color	Black with White Reflective Tape / Black with Yellow Reflective Tape / Blue with White Reflective Tape
Install Hardware	Asphalt 14" Rebar Spikes (3) / Without Hardware

PRODUCT DESCRIPTION

This 4" high rubber parking curb is a high-performance alternative to traditional concrete or plastic models. Designed for long-term durability and safety, it is made from 100% recycled rubber that withstands ultraviolet rays, oil exposure, and extreme temperature swings without cracking or warping.

The curb includes molded-in reflective tape for improved visibility, increasing pedestrian and vehicle safety. Its lightweight structure makes it easy to position, install, or remove, whether you need a temporary solution or a permanent fixture. Ideal for use on asphalt surfaces, this product helps prevent damage to low front-end vehicles while offering a maintenance-free solution for traffic control and parking management.

Picture shown is the 6' length option. Proposition 65 Warning applies. Due to market disruption the image shown may vary slightly from the product received.
