PRODUCT DESCRIPTION

The 6ft Yellow Plastic Parking Curb provides a dependable solution for controlling vehicle placement and protecting structures in indoor and outdoor parking areas. Made from durable plastic, it is a safer and longer lasting alternative to traditional concrete curbs. The 4" height helps reduce damage to low front end vehicles, and the bright yellow color improves visibility for drivers. Its lightweight construction allows for fast installation without the need for heavy equipment. This curb is ideal for commercial garages, residential complexes, and temporary parking setups. Installation hardware is available for asphalt using 14" rebar spikes.
