PRODUCT DESCRIPTION

The Park Sentry Square Kit in Yellow is a complete solution for protecting square and rectangular columns in parking structures and industrial settings. Featuring high-visibility ARPRO® components, this kit combines durable corner pieces with interlocking planks and adjustable straps to form a continuous wrap-around guard. Each corner is engineered for impact at vulnerable points, while planks provide a low-profile layer of protection that conforms to the shape of the column. The included straps feature reflective bands for added visibility. Ideal for high-traffic garages, this all-in-one kit helps reduce damage, prevent corrosion, and enhance overall safety.
