PRODUCT DESCRIPTION

Provide lasting protection and visibility for cylindrical columns with these durable ARPRO® planks. Each 1.6" thick piece wraps cleanly around round concrete structures up to 24" in diameter. The interlocking design forms a seamless, one-piece barrier, while recessed strap channels help maintain a clean, unobtrusive look. Made from scratch-resistant ARPRO material, the planks resist impact, road salts, and debris—making them ideal for indoor or outdoor parking facilities. Easily trimmed or configured for custom installations. Sold in packs of three. Straps sold separately.
