Park Sentry® 4 Planks - Black

SKU: Park Sentry / PSP-050-B-CTN

Scan for product page

Highlighted Features

- ✓ 1.6" thick scratch-resistant ARPRO® material with lighter density for flexible use
- ✓ Designed to interlock with Park Sentry Corners for full-column wraparound protection
- ✓ "Progressive Resistance" technology cushions stronger impacts more effectively
- ✓ Cut-to-size with vertical rib guides every 1.6" for easy customization
- ✓ Recessed strap channels and hidden offset grommets provide clean installation

SPECIFICATIONS

Material	ARPRO Polymer
Thickness	2.2"
Length	39"
Color	Black
Installation Type	Indoor / Outdoor
Installation Method	Removable Strap
Weight	5 lbs
Dimensions (L x W x H)	40 × 19 × 8 in

PRODUCT DESCRIPTION

Park Sentry Planks are designed to enhance column protection by providing a seamless wrap-around solution when combined with Park Sentry Corner units. Each plank is constructed from patented ARPRO material—1.6" (40mm) thick—with a lighter density than the corner components, allowing for flexibility while still delivering effective impact absorption.

The planks feature vertical ribs every 1.6" (40mm) that serve as built-in cutting guides, making it easy to customize for square or rectangular columns of varying sizes. The interlocking system enables a secure fit between planks and corners, creating a single-piece wraparound installation that protects all faces of the column.

Park Sentry Planks are equipped with recessed strap channels that create a smooth finish and hide optional offset grommets for mechanical installation. The surface is scratch resistant and engineered with "Progressive Resistance" technology, which increases its ability to absorb force as impact levels rise.

Suitable for indoor and outdoor use, the material resists corrosion from road salts, moisture, and debris. Each set includes four planks and is intended for use with Park Sentry Corner units to complete a full-column protection system. Sold in packs of 4. Straps sold separately.
