Dimensions (L x W x H)	22 × 8 × 4 in

PRODUCT DESCRIPTION

This C-Shaped Stainless Steel Corner Guard is engineered to protect vulnerable column corners in commercial and industrial facilities while offering a clean, modern look. The durable stainless steel surface resists scratches, corrosion, and impact from carts, equipment, or foot traffic. Designed for core and drop installation, it mounts securely with no exposed hardware, maintaining a sleek, tamper-resistant appearance. A built-in decorative band adds structural strength while enhancing the overall aesthetic. Ideal for high-traffic zones in hospitals, warehouses, retail centers, and transit hubs, this corner guard installs quickly and removes easily for routine maintenance or cleaning.
