Highlighted Features

- Set of 4 Corner Guards - 42" Height
- Flexible EVA material - High Visibility Yellow
- Absorbs impact to reduce damage
- Tapered design keeps a low profile
- Easy install with fasteners, adhesive or straps (not included)

SPECIFICATIONS

Material	EVA
Color	Yellow
Height	42"
Installation Type	Fastener / Straps / Adhesive
Weight	24 lbs
Dimensions (L x W x H)	48 × 24 × 24 in

PRODUCT DESCRIPTION

The Corner Sentry™ provides durable, high-visibility protection for exposed corners in busy industrial environments. Constructed from flexible, impact-absorbing EVA material, it cushions collisions to help prevent damage to both structural corners and passing vehicles. Unlike traditional welded or bolted metal guards that simply distribute impact, Corner Sentry™ is designed to absorb and deflect force directly—minimizing wear and reducing repair costs.

Its bright yellow color improves visibility to drivers and equipment operators, while the low-profile, tapered shape ensures effective coverage without obstruction. Integrated front ribs add rigidity, and precision-cut grooves at the rear improve strength and flexibility. Installation is fast and versatile—use standard concrete anchors, construction adhesives, or secure with optional straps through recessed channels. Offset grommets allow secure mounting without compromising the wall or post behind it.
