SPECIFICATIONS

Material	Schedule 40 Steel
Finish	Galvanized
Height	7"
Thickness	1/4"
Installation Method	Core & Drop
Weight	13 lbs
Dimensions (L x W x H)	7 × 6 × 6 in

AVAILABLE ADD-ONS

Add-On
5/8" x 4" Concrete Anchor Bolts (Set of 2)

PRODUCT DESCRIPTION

Designed for compact yet critical protection, the 7" Angled Corner Guard is ideal for shielding equipment legs, drywall corners, and exposed utility lines such as plumbing, electrical conduits, and water pipes. Crafted from Schedule 40 steel with a galvanized finish, this guard provides long-lasting resistance to impact and corrosion in demanding warehouse and retail environments.

Its angled shape allows for a tighter fit around corners and vertical structures, while break lines in the steel increase overall strength and rigidity. With no exposed hardware, it maintains a clean, professional appearance while helping to minimize repair costs from accidental bumps or scrapes. Installation is quick and secure using 5/8" x 4" bolts (sold separately).
