Rubber Corner Guard

SKU: GNR - CG800

Scan for product page

Highlighted Features

- Durable one-piece rubber design absorbs impact and flexes without cracking
- High-visibility yellow reflective tape enhances driver awareness in low light
- Mounts vertically or horizontally on walls, beams, or dock edges
- Weather-resistant and low maintenance—suitable for indoor or outdoor use

SPECIFICATIONS

Color	Black / Yellow
Material	Rubber
Installation Method	Surface Mount
Weight	4 lbs
Dimensions (L x W x H)	36 × 5 × 5 in

PRODUCT DESCRIPTION

The rubber corner guards help protect property and vehicles from dents and scratches and are ideal for surface and multi-level parking lots and interior factory / warehouse walls.

Designed to absorb impact and reduce damage in high-traffic areas, this heavy-duty rubber corner guard is a practical solution for protecting infrastructure in parking facilities, warehouses, and loading docks. Made from high-impact natural rubber, the one-piece construction flexes slightly to absorb force, helping prevent harm to both vehicles and structural corners.

Bright yellow reflective stripes increase visibility from a distance and in low-light conditions, providing better guidance for drivers in tight spaces. Easy to install on your own, the corner guard can be mounted vertically or horizontally on walls, columns, or beams. Suitable for indoor or outdoor use, this guard performs well in all weather and requires minimal maintenance over time.
