PRODUCT DESCRIPTION

Protect overhead door tracks from costly impact damage with this heavy-duty track guard set. Designed for high-traffic industrial and warehouse environments, these guards bolt directly to the floor or wall without interfering with door operation. Built from Schedule 40 steel and finished in high-visibility yellow powder coat, they provide a strong, reliable barrier against forklifts, pallet jacks, and other equipment.

Each guard installs easily using surface-mounted concrete anchor bolts (not included) and is suitable for both new and retrofit applications. The set includes one left and one right guard for complete protection on both sides of the door track.
