## PRODUCT DESCRIPTION

This Rack Sentry protector is 18´´ tall and fits 3´´ wide racks. The off set cut out is 6´´ wide and 5´´ from the end, to fit racks with low beams. Made from durable EVA material, Rack Sentry is engineered to absorb impact by flexing and returning to its original shape, significantly reducing the risk of damage to rack structures, forklifts, and products.

Rack Sentry is tested to withstand impacts up to 3 mph from a 5000 lb forklift without visible damage. The tool-free design uses included hook and loop fasteners, allowing for fast and easy installation without drilling or floor anchoring.
