Column Sentry - 8" x 8" Square Column with Fire Extinguisher Cut Out

SKU: Sentry / CS2442-8SFE

Scan for product page

Highlighted Features

- 24" outer diameter and 42" height
- Fits up to 8" square, or up to 8" x 8" H beam, or up to 8" round columns
- Contains a cut out 10" wide and 8" deep designed to accommodate fire extinguisher mounted to the face of the column
- Installs easily with no tools required
- Weatherproof, chemical-resistant, and UV-stabilized for outdoor or indoor use
- Patented air chambers deflect impact to prevent column damage

SPECIFICATIONS

Outer Diameter	24"
Height	42"
Base Size	8" x 8" Column
Material	Low Density Polyethylene
Installation Method	Adjustable Straps
Weight	56 lbs
Dimensions (L x W x H)	43 × 25 × 24 in

PRODUCT DESCRIPTION

The Column Sentry CS2442-8SFE is designed to protect 8-inch square columns from forklift and vehicle impacts in warehouses, factories, and other industrial spaces. Compact yet durable, this protector surrounds the column with a cushioned layer of defense that absorbs collisions and helps prevent costly structural damage. This model features more padding and has a 24" OD.

Made from low density polyethylene using rotational molding, the Column Sentry features patented air chambers that deflect and disperse impact energy. The protector absorbs and bounces back from repeated forklift strikes without losing shape or performance.

Installation is fast and simple with no tools required. Once in place, the weatherproof, chemical-resistant, and UV-stabilized material ensures long-term protection with zero maintenance. The unit is also stackable for additional coverage if needed, making it a flexible and durable solution for high-risk column areas.
