### SPECIFICATIONS

Weight	62 lbs
Dimensions (L x W x H)	78 x 10 x 10 in

### PRODUCT DESCRIPTION

Create a high-performance handicap parking solution with the 4" SlowStop® Bollard and Sign Post system. This complete kit includes a rebounding steel bollard, aluminum signpost, HDPE sign, mounting brackets, and all necessary anchors. Designed for durability and impact resistance, the patented SlowStop® technology allows the bollard to flex and rebound after impact, reducing damage to vehicles, the post, and surrounding concrete.

Unlike traditional fixed posts or wheel stops, this modular system eliminates the need for frequent replacements and repairs. The elastomer base absorbs energy on impact, while the powder-coated yellow finish offers high visibility. Simply install on a concrete pad, fill the bollard with foam, and enjoy long-lasting protection for both signage and vehicles.

#### Key Features:

- Rebounding bollard system absorbs impact and protects vehicles and infrastructure
- Eliminates the need for separate wheel stops in handicap spaces
- Easy surface mount installation without core drilling
- Includes aluminum signpost, plastic cap, elastomer base, cast iron adapter, set screws, and anchor bolts
- Powder-coated yellow steel bollard with high visibility and corrosion resistance

### FREQUENTLY ASKED QUESTIONS

#### Q: What is the installation method?

The SlowStop bollard system installs using a surface-mounted anchor system. A step-by-step installation guide is available to walk you through placing, drilling, and mounting the unit properly.
