SPECIFICATIONS

Material	Polypropylene Plastic
Diameter	34"
Height	41"
Installation Type	Tough Lock System
Base Size	24" Pyramid / 24" Square / 34" Round

PRODUCT DESCRIPTION

Poletector Light Pole Guard 34" - The Maintenance-Free Solution for Light Pole Protection

Transform damaged, unsightly light pole bases into professional-looking assets while preventing future vehicle collisions. The Poletector 34" Light Pole Guard is a durable polypropylene cover that shields your poles from impact damage and eliminates costly repairs, all while enhancing your property's curb appeal. This is an innovative protective guard that provides dual protection for both vehicles and light pole bases, reducing liability and maintenance costs across your property.

Made from tough, weather-resistant polypropylene plastic, the Poletector stands up to impacts, UV exposure, and harsh weather conditions without cracking, fading, or requiring any maintenance. The custom-cut top accommodates both square and round poles, fitting 34" round bases, 24" pyramid bases, or 24" square bases - making it compatible with most standard light pole configurations. At 34" in diameter and 41" in height, it provides substantial coverage for the critical lower section where damage most commonly occurs.

Installation is secure and hassle-free thanks to the proprietary Tough Lock System™, which ensures tamper-proof placement that stays firmly in place while deterring theft and vandalism. The guard instantly covers chipped paint, rust, concrete damage, and other eyesores at the pole base, improving the overall look of your parking lot or facility. Choose from eight great colors including Black, Brown, Imperial Blue, Red, Safety Blue, Silver, White, and Yellow to match your facility's aesthetic or enhance visibility.

Stop the cycle of repainting, patching, and repairing damaged light pole bases.
