Anchor Style	Cast-in Threaded Inserts Type A / Steel Pipe Insert Type B Most Common

PRODUCT DESCRIPTION

The cylindrical concrete bollard with three reveal lines is built to last and designed to look good doing it. Poured from solid concrete, it stands up to the elements and provides real protection where people and vehicles meet. The surface is smooth and simple, broken up by three recessed lines that give it just enough detail to catch the eye without being distracting. It can be used to mark boundaries, protect storefronts, or guide traffic in busy spaces. What makes this style stand out is the balance it strikes between strength and appearance. It does its job as a barrier, but it also adds a clean, finished look to the area around it.
