PRODUCT DESCRIPTION

The Gander Mountain bollard is a solid concrete post built for strength and visibility. Its clean cylindrical shape is accented by a lighted ring that adds both style and function. During the day, the bollard serves as a durable barrier to protect storefronts and pedestrian areas. At night, the illuminated band stands out, guiding traffic and making walkways safer. This mix of rugged construction and thoughtful design makes it a reliable choice for retail sites, commercial entrances, and any setting where security and appearance need to work together.
