PRODUCT DESCRIPTION

This round concrete bollard with a dome top delivers strength in a simple shape. Standing 42 inches tall and 18 inches across, it carries close to a thousand pounds of reinforced concrete. The weight alone tells you it is made to handle impact and hold its place in busy environments. Installers can set it with threaded inserts or a core mount base, depending on site requirements. Color choices include a full range of Weatherstone and acid wash finishes, from soft grays to deep brick tones. With its clean lines and heavy build, the dome top style works well at storefronts, campuses, walkways, and other spaces that call for clear, durable protection.
