PRODUCT DESCRIPTION

The Cylinder Dome Top concrete bollard has a simple bullet shape that feels both sturdy and unobtrusive. Standing 36 inches tall and 12 inches across, it is heavy enough to resist impact yet compact enough to work in tighter spaces. Reinforced concrete gives it the durability needed for years of outdoor use. Installers can select either threaded inserts or a core mount base depending on the project. Available in a wide range of finishes, from soft neutral tones to deeper accent colors, this bollard adapts easily to its surroundings. It is a practical choice for storefronts, pathways, campuses, or any site that needs clear and lasting protection.
