PRODUCT DESCRIPTION

This reinforced concrete bollard is shaped to look like a baseball or softball set on a sturdy base. The rounded top makes it stand out while the solid concrete body provides the weight and strength needed for real protection. It is built with reinforced concrete to handle years of weather and impact. With a range of finish colors available, it can blend into its surroundings or be matched to school, park, or team colors. This style is often used near stadiums, recreation areas, or parks where a sports theme is a good fit.
