Material	Reinforced Concrete / Steel Rebar
Finish	Acid Wash / Weatherstone
Mount Type	Pipe Insert or J-hook Anchors
Weight	315 lbs
Dimensions (L x W x H)	20 × 20 × 33 in

PRODUCT DESCRIPTION

This is a square concrete bollard that narrows as it rises, giving it a subtle obelisk look. It stands about three feet tall and feels solid underfoot. The reinforced concrete makes it heavy enough to hold its ground in busy areas. You can mount it using threaded inserts or a core base, depending on your needs. It comes in a selection of finish colors that let it blend in or stand out a bit. It works well as a marker, a minor monument, or a sturdy anchor in landscapes, pedestrian zones, or pathway edges.
