SPECIFICATIONS

Outer Diameter	18"
Height	34" / 38"
Material	Reinforced Concrete / Steel Rebar
Finish	Acid Wash / Weatherstone
Mount Type	Pipe Insert or J-hook Anchors
Country of Manufacture	USA

PRODUCT DESCRIPTION

These cone-shaped concrete bollards taper from a wide base to a narrower top, giving them a clean profile with solid weight behind it. Both models share the same base diameter but differ in height and overall mass. Each is cast in reinforced concrete to handle years of weather and impact without shifting. Installers can set them with threaded inserts or a core base depending on the site. Finish colors range from neutral stone shades to stronger accents, making it easy to match surrounding architecture. The cone shape works well in plazas, walkways, or storefront areas where you want protection that looks simple and deliberate.
