Finish	Hot-Dipped Galvanized / Powder Coated Black / Powder Coated Yellow

PRODUCT DESCRIPTION

The SafetyX Round 4" ASTM F3016 S10/S20 Crash Rated Bollard offers proven storefront protection and reliable pedestrian safety. Certified to stop a 5,000 pound vehicle traveling at 10 or 20 miles per hour, this crash rated bollard helps safeguard entrances, sidewalks, and customer areas from unexpected vehicle impact.

Built for strength and longevity, the SafetyX bollard features a reinforced internal I-Beam and a hot dipped galvanized finish that resists wear and corrosion. It is engineered for consistent performance in retail, restaurant, and commercial settings where safety and appearance both matter.

Installation is straightforward with a core drill design that makes retrofit projects faster and more cost effective. Multiple finish options allow the bollard to blend with architectural surroundings while maintaining a professional look.

- ASTM F3016 certified crash rated bollard tested for vehicle impact safety
- Reinforced with internal I-Beam construction for dependable strength
- Hot dipped galvanized finish for lasting durability in all conditions
- Core drill design simplifies installation and retrofit projects
- Available finishes to complement storefront and facility design

Choose the SafetyX Round 4" ASTM F3016 S10/S20 Crash Rated Bollard to protect customers, employees, and property while reducing

risks of storefront crashes and costly downtime.
