Wheel Option	Include Wheels / No Wheels

SPECIFICATIONS

Weight	90 lbs
Dimensions (L x W x H)	24 x 24 x 12 in

PRODUCT DESCRIPTION

The 30 lb rubber base portable sign post is designed for durability and convenience. It is made from dense recycled rubber that resists cracking, fading, and damage from oil, salt, or moisture. The base includes molded hand grips, making it simple for one person to lift, move, and position as needed. Its weight provides reliable stability while still remaining practical for everyday use.

A reinforced 60-inch square post is available, complete with zinc-plated hardware and a post cap for secure sign mounting. Pre-drilled holes in the post allow signs to be attached quickly without additional modification. The base can be stacked to save space during storage or shipping, and optional polyurethane-lined wheels are available to roll quietly and resist rust in outdoor conditions.

This sign base is a practical choice for parking areas, job sites, sidewalks, and temporary events. It combines a rugged long-lasting construction with portability, giving you dependable performance without requiring permanent installation.
