### PRODUCT DESCRIPTION

Our U-shaped pipe guards are designed to protect vulnerable equipment and traffic areas with a wider shield than a single post. Built from 3.5 inch outside diameter Schedule 40 steel, these guards provide reliable strength for long-term performance in demanding environments.

Three standard sizes are available: 36 inches wide by 53 inches high, 41 inches wide by 51 inches high, and 48 inches wide by 50 inches high. Please Inquire About Other Available Sizes. This range of widths and heights makes it easy to match site requirements, whether the guard is being used around fuel pumps, electrical panels, dock doors, or building corners.

Each unit can be supplied in a prime painted finish or finished in 304 stainless steel for corrosion resistance and a clean look. With solid construction and professional appearance, our U-shaped pipe guards deliver both impact protection and lasting value for commercial and industrial facilities.
